

May 5, 2023 – Received Bridges data layer from Asia; Need updated metadata file.

Name: DPW - Bridges

Layer Type: Point

Description: Location points of County maintained Bridges on the island of Hawai‘i.

Source: County of Hawai‘i, Department of Public Works, Engineering Division; compiled on March 2010.

History: Created in ArcMap 9.3.1. by the County of Hawai‘i, Planning Department, 2010. Point data illustrated in this data layer were added by using the County of Hawaii Tax Assessor Parcel Data layer as a background coverage to identify its' specific location by tax map key description.

Attributes:

FID	(Internal software number)
SHAPE	(Type of Date produced, Point)
BRIDGE_NO	Identification number
NAME	Name of bridge
TYPE	Construction material type
LENGTH_FT	Bridge length in feet
WIDTH_FT	Bridge width in feet
SPANS	Bridge span
WEIGHT_LMT	Bridge weight limit
DISTRICT	Name of district

Note: This data layer is intended for planning purposes only and should not be used for boundary interpretations or other spatial analysis beyond the limitations of the data.

The “DPW Bridge” data layer is parcel-specific when attempting to identify its’ location. The location of the points was intended to illustrate the approximate location of a county maintained bridge. This data layer does not include bridges maintained by the State, Dept. of Transportation – Highways Division.
