Note: This data layer is intended for planning purposes only and should not be used for boundary interpretations or other spatial analysis beyond the limitations of the data.

The 'PUD' data layer may be parcel-specific when attempting to identify its' location. However, users should be aware that subsequent subdivision or consolidation of parcels would change the configuration and/or tax map key numbers. Updates will occur to address this issue as time permits.

Please note that the PUD data layer is subject to periodic changes due to parcel boundary line adjustments.
