Note: This data layer is intended for planning purposes only and should not be used for boundary interpretations or other spatial analysis beyond the limitations of the data.

The 'Use Permits' map is parcel-specific when attempting to identify its' location. However, users should be aware that subsequent subdivision of parcels would change the tax map key numbers. Updates will occur to address this issue as time permits.

Hyperlinked documents that are provided in GIS allows for a quick review of the subject application process and status. Further research of the Planning Department's file is recommended to ensure a full understanding of the application process, including various correspondences that may have occurred that may be pertinent while researching.

Please notify the GIS Section for any discrepancy.
