James L. Jolliff, Ph.D  
P.O. Box 6085  
Kamuela, Hawaii 96743

Dear Dr. Jolliff:

Ohana Dwelling Permit (OD 90-297)  
Tax Map Key: 6-5-10;22, Lot 33

2045

The subject application has been reviewed by the concerned agencies and note:

1. The subject tax map key parcel is served by an acceptable street;
2. The subject application can meet with the State Department of Health wastewater treatment and disposal systems requirements;
3. The copy of document(s) received August 3, 1990, October 22, 1990, November 7, 1990, December 3, 1990 and February 14, 1991 relating to subject tax map key parcel to establish title and exhibits contained therein do not include any deed restriction or covenant to prohibit construction of requested ohana dwelling; and,
4. The submitted site plan denotes two off-street parking stalls on the property.

In view of the above, by this letter, you are hereby granted permission to construct the Ohana Dwelling, subject to the following condition(s):

- (a) The building permit for the Ohana Dwelling shall be secured on or before February 20, 1993. If the applicant and/or owner fails to secure a building permit within two (2) years of the date of this letter, permission to construct the subject ohana dwelling shall be deemed void. A time extension may be granted for good cause, provided, the permittee and/or owner applies in writing at least forty-five (45) calendar days before the expiration of the two (2) year period.

FEB 22 1991

- (b) Off-street parking space for two vehicles is designated on the submitted site plan to fulfill the off-street parking requirement. The off-street parking spaces may not be employed for storage or other use unless and until approved alternative on-site parking arrangements are established.
- (c) All construction drawings together with approved site plan drawn to scale submitted with the ohana dwelling building permit application shall denote location and identify required two (2) off-street parking spaces.
- (d) The ohana dwelling shall conform to all requirements of codes and statutes pertaining to access and building construction.
- (e) The applicant shall conform to State Department of Health standards and regulations and following comment(s) dated October 24, 1990 :

"Our records show that a cesspool for the subject property was inspected and approved by our department on May 11, 1972. The owner of record was listed as a Chuck McWayne, Jr. We believe that the applicant's reference to a 'septic tank' on his site plan is meant to identify the location of the cesspool. If this is not so, then plans and specifications for the septic tank system, drawn by a Registered Professional Engineer, must be submitted to our department for review and approval.

Per Administrative Rule, Title 11, Chapter 62, 'Wastewater', a single individual wastewater system (IWS) may receive no more than 800 gallons per day of sewage which is generated from a single or multiple unit complex containing a total of no more than four (4) bedrooms. Developments that exceed four (4) bedrooms must install another individual wastewater system.

The minimum setback requirements for an IWS as per Administrative Rules 11-62 must be met.

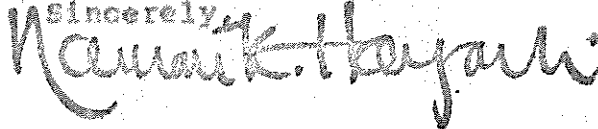

The Department of Health would like to inform the applicant that wastewater rules are in the process of change and that comments on the project may change accordingly."

- (f) This Ohana Dwelling permit is subject to all other applicable rules, regulations and requirements, including but not limited to those of the Planning Department, Department of Public Works, and State Department of Health.
