Dear Mr. Camblor:

**OHANA DWELLING PERMIT NO. 3866 (OHD 00-015)**

The subject Application for an Ohana Dwelling Unit Permit was reviewed by the required agencies and their respective comments are as follows:

1. The Department of Public Works (DPW) (memorandum dated December 21, 2000):

“We have reviewed the subject application and have the following comments:

1. The subject property is located within Flood Zone VE according to the Flood Insurance Rate Map by the Federal Emergency Management Agency. Flood Zone VE is the Special Hazard Area inundated by the 100-year coastal flood with velocity (wave action) and known base flood elevations.
2. Any new construction or substantial improvement within the subject property will be subject to the requirements of Chapter 27-Flood Control, of the Hawaii County Code.”

3. The Department of Water Supply (DWS) (memorandum dated December 18, 2000):

“We have reviewed the subject application and have the following comments:

For your information, an existing 5/8-inch meter services this property and is adequate for only one dwelling at 600 gallons per day. This application is proposing an additional detached dwelling, so the installation of a separate 5/8-inch meter by the applicant is required in accordance with Department regulations. Water is available from the 6-inch waterline in Kalanianaʻole Street, which fronts the subject parcel.

Therefore, the Department has no objections to the proposed application subject to the applicant understanding and accepting the following conditions:

1. Installation, by the Department of Water Supply, of a second 1-inch service lateral to service a 5/8-inch meter, which shall be restricted to a maximum daily flow of 600 gallons as the existing service is.
2. Since this parcel is in a tsunami zone, a backflow preventer (reduced pressure type) must be installed by a licensed contractor on the applicant's property just after the meter. The installation and assembly of the backflow preventer must be inspected and approved by the Department before the water meter can be installed. The backflow preventer shall be operated and maintained by the customer. A copy of our backflow preventer handout is being forwarded to the applicant to help them understand this requirement.
3. Remittance of the following charges, which are subject to change, to our Customer Service Section:

a. Facilities Charge (One 2 <sup>nd</sup> service at \$3,375.00 each)	\$3,375.00
b. Service Lateral Installation Charge (Install one meter on a County road)	<u>+1,200.00</u>
<b>Total (Subject to Change)</b>	<b>\$4,575.00</b>

Lastly, this is not a condition of granting the ohana dwelling permit or a Department requirement, but this would be an opportune time to retrofit the existing meter with a backflow preventer as described above.

“The Department of Health would support any sewer requirements made by the County of Hawaii for the proposed project.”

5. The Hawaii County Fire Department (HFD) (memorandum dated December 13, 2000):
