CERTIFIED MAIL

Z 179 517 467

December 3, 1997

Mr. Willie K. Tallet, President
Mauna Kea Agribusiness Company, Inc.
P.O. Box 1826
Honolulu, HI 96805

Dear Mr. Tallet:

Variance Permit No. 874 (VAR 97-066)
Applicants: MAUNA KEA AGRIBUSINESS
Owners: MAUNA KEA AGRIBUSINESS
Request: Variance From Chapter 23, Subdivisions, Article 6, Division 2,
Improvements Required, Section 23-84, Water Supply, (1)
Tax Map Key: 2-7-002:003

After reviewing your application and the additional information submitted, the Planning Director certifies the approval of your variance request to allow the creation of a two (2) lot subdivision without a water system meeting with the minimum requirements of Division 2, Section 23-84,(1), of the Subdivision Code.

The Planning Director has concluded that the variance from the minimum subdivision water requirements be approved based on the following findings.

SPECIAL AND UNUSUAL CIRCUMSTANCES

There are special and unusual circumstances that exist which would warrant consideration of and necessitate a variance from the minimum water requirements to the proposed two (2) lot subdivision of the subject property:

11973

DEC 04 1997

Mr. Willie K. Tallet, President
Mauna Kea Agribusiness Co., Inc.

Page 2

December 3, 1997

1. The subject property is identified as TMK: (3) 2-7-002:003 and contains 1096.103 acres.
2. The subject parcel is zoned Agricultural (A-20a) by the County and designated Agriculture "A" by the State Land Use Commission (LUC).
3. The applicant submitted a subdivision application (SUB 97-055) and preliminary plat map dated April 25, 1997 showing a proposed 2-lot subdivision of "LOT 1-A" into "LOT 1-A-1" and "LOT 1-A-2". Further action on the proposed 2-lot subdivision application is being deferred pending consideration of the subject water variance application.

4. The Department of Water Supply (DWS) memorandum dated June 3, 1997, states in part:

"Please be informed that the Department's existing water system facilities cannot support the proposed subdivision at this time. Extensive improvements and additions, including source, storage, transmission, booster pump, and distribution facilities must be constructed. Currently, sufficient funding is not available and no time schedule is set.

For your information, the Department maintains a water system facility within remainder Lot 1-A-1."

5. The State Department of Health (DOH) memorandum dated October 21, 1997 states:

"The Department of Health's authority on drinking water quality is based on the definition of a "public water system." A "public water system" means a system for the provision to the public of piped water for human consumption, if such system has at least fifteen (15) service connections or regularly serves an average of at least twenty-five (25) individuals daily at least sixty (60) days out of the year.

Past episodes of water quality concerns for lead, copper, algae and microbial contaminations in private rain catchment systems have identified the need for design standards. Without these control standards the Department of Health would not be able to support the use of these private rain catchment systems for drinking purposes."

Mr. Willie K. Tallet, President
Mauna Kea Agribusiness Co., Inc.
Page 3
December 3, 1997

6. The applicant submitted "ATTACHMENT TO Application for Variance Variance from Minimum Water Requirements" to the department on August 6, 1997, describing the adequacy of rainfall in the area to support rain catchment systems.
7. The memorandum dated October 17, 1997 from the Department of Finance-Real Property Tax office states:

"Property is receiving agricultural use value Pasture

Possible rollback taxes

Current Real Property taxes are paid through December 31, 1997."
8. No objections were received from the surrounding property owners situated within 300 feet of the subject property.

Therefore, considering the above facts and information submitted with the applicant's variance application, the Planning Director has determined that there are special or unusual circumstances applying to the subject property which exist either to a degree which deprive the applicant or owner of substantial property rights that would otherwise be available, or to a degree which obviously interferes with the best use or manner of development of the subject property.

ALTERNATIVES

There are no other reasonable alternatives in resolving the difficulty of the petitioner.

The first alternative requires the owner to provide the necessary dedicable water system improvements in accordance with the standards required by DWS. The second alternative would be to drill and develop private wells and install the necessary water system improvements in accordance with standards required by DWS.

The pro rata cost per lot for the water system design and construction of an approved dedicable or private water system is economically cost prohibitive. As such, the imposition of improving the existing public water system or providing a private water system for the proposed two (2) lot subdivision would be putting excessive demands upon the owner when a more reasonable alternative is available.

Mr. Willie K. Tallet, President
Mauna Kea Agribusiness Co., Inc.

INTENT AND PURPOSE

The intent and purpose of requiring a water system within a subdivision is to assure that adequate water is available for human consumption and fire protection.

The analysis of existing site conditions, official maps and rainfall summaries in DWS and the Planning Department appears to support the information regarding rainfall data submitted by the owners. The analysis of available private and public information appears to indicate there is adequate rainfall within the subject property and the surrounding areas to support private rain catchment system(s) for potable uses. The State Department of Health has no specific rules or regulations relating to the utilization, construction or inspection of private rain catchment systems.

The analysis of the applicant's statements appears to indicate that there is adequate rainfall within the subject property to support a private rain catchment system for emergency and fire fighting purposes. Provisions for fire protection will be addressed and provided by the owner on the subject property.

DETERMINATION-VARIANCE CONDITIONS

No objections to the subject variance were received from the surrounding property owners and the participating government agencies.

Based on the foregoing findings, this variance request would be consistent with the general purpose of the zoning district and the intent and purpose of the Zoning Code, Subdivision Code and the County General Plan; will not be materially detrimental to the public's welfare and will not cause substantial adverse impact to the area's character and to adjoining properties.

The water variance request is approved subject to the following conditions:

1. The owner, his assigns or successors shall be responsible for complying with all stated conditions of Variance Permit No. 874.
2. The owner, his assigns, or successors shall file a written agreement or approved written document with the Planning Department within one (1) year from the issuance of tentative subdivision approval and prior to receipt of final subdivision approval of SUB 97-055 that shall contain the following deed language being covenants, condition and restrictions which affects only "LOT 1-

Mr. Willie K. Tallet, President
Mauna Kea Agribusiness Co., Inc.
Page 5
December 3, 1997

A-2" and shall be duly recorded at the Bureau of Conveyances of the State of Hawaii by the Planning Department at the cost and expense of the owner:

- a. The owner agrees and accepts the fact that a County dedicable public water system is not now or in the foreseeable future able to service "LOT 1-A-2" created by the subject subdivision application.
- b. The owner agrees and accepts the fact that the County will not, at any time, bear the responsibility of supplying public water to "LOT 1-A-2" created by the subject subdivision application.
- c. The permitted dwellings and accessory structures not serviced by a County water system shall be provided with and maintain a private potable catchment system which includes a minimum 6,000-gallon water storage tank or equivalent facility for domestic consumption or potable uses. The private rain catchment system shall adhere to the Department of Public Works, Building Division's "Guidelines for Owners of Rain Catchment Water Systems" as well as the State Department of Health requirements related to water testing and water purifying devices.
- d. Each permitted farm dwelling shall be provided with and maintain a private water supply system which includes an additional water storage capacity at a minimum of 3,000 gallons of water for fire fighting and emergency purposes. The design, including appropriate connector systems and location of the separate water storage capacity shall meet with the approval of the Hawaii County Fire Department.
- e. In the event that there are any amendments or changes to the subdivision after the agreement is signed, the owner shall be responsible for informing the County Planning Department of such amendments or changes so that the agreement can be amended thusly. Further, the written agreement shall be considered as a condition and covenant running with the land and shall be binding upon the owners, successors, and assigns and shall be incorporated as an exhibit and made part of each agreement of sale, deed, lease, or other similar documents affecting the title or ownership of the subject property or the subdivided lot.
- f. In the event that "LOT 1-A-2" created by SUB 97-055 is provided with water service (individual meter) from the Department of Water Supply

Mr. Willie K. Tallet, President
Mauna Kea Agribusiness Co., Inc.
Page 6
December 3, 1997

or an approved private water system, the recorded conditions and covenants will no longer be in effect.

3. The owner, his successors or assigns shall comply with all other applicable State and County rules and regulations pertaining to subdivisions and land use.

Thank you for your understanding and patience during our review.

Should any of the foregoing stated conditions not be complied with, the Planning Director may proceed to declare this Variance Permit null and void.

Sincerely,

VIRGINIA GOLDSTEIN
Planning Director
