July 30, 1998

Mr. Donald C. McIntosh
P.O. Box 58
Kailua-Kona, Hawaii 96745-0058

Dear Mr. McIntosh:

Variance Application WH(VAR 98-037)
Variance No. 941
Applicant: RANDY P. HAIMS
Owner: RANDY P. HAIMS
Request: Variance From Minimum Front Yard Requirements
Tax Map Key: 7-7-021:098

After reviewing your application and the additional information submitted, the Planning Director certifies the approval of your variance request to allow existing detached garage with a 18.55 feet front yard in lieu of the minimum 20 feet front yard, as required by Ordinance 96-10, Chapter 25, Article 5, Division 1, Section 25-5-7(a)(2)(B), Ordinance 97-88.

The subject property is located at Komohana Kai Subdivision, Lot 98, Unit 2, File Plan 1737, at Holualoa 3, North Kona, Hawaii, Tax Map Key: 7-7-021:098.

SPECIAL AND UNUSUAL CIRCUMSTANCES

1. The subject property consists of 15,001 square feet of land area.
2. The subject single family dwelling was issued the following building permit:
 1. Building Permit No. 905237 opened on February 8, 1990 and closed on January 3, 1992 for the construction of a dwelling and detached garage.
3. A survey map prepared by Donald C. McIntosh, on November 9, 1997, shows the existing detached garage with a 18.55 feet front yard in lieu of the minimum 20 feet

front yard. As such the garage encroaches 1 foot 5-3/8 inches into the required 20 feet front yard.

4. When the building permit was approved, the owner received all of the necessary Department of Public Works, Building Division approvals for the garage.
5. When approved by the Planning Department, the plans would have had to have shown that all minimum required setbacks were going to be adhered to for the proposed garage in 1990.
6. There appears to have been a construction staking error in the siting of the structure on the property. This occurred in 1990 when the garage was constructed. There also appears to have been a very minor siting error made at the time of construction with the encroachment. No other evidence has been found to show otherwise.
7. It has been over 8 years since the construction of the existing garage was approved by the County, and the applicant is trying to resolve a situation which he had no control over and has honestly conducted a certified survey to ensure the disclosure of all facts concerning the garage.
8. The variance application was filed with the Planning Department on June 1, 1998.

There were no objections from any of the participating government agencies or any surrounding property owners.

Therefore, considering the foregoing facts, the Planning Director has determined that there are special or unusual circumstances applying to the subject property which exist either to a degree which deprives the owner or applicant of substantial property rights that would otherwise be available or to a degree which obviously interferes with the best use or manner of development of the subject property.

ALTERNATIVES

1. The owner on his own volition is honestly trying to resolve this long standing problem which was not created by him. The investigation of this particular matter has not revealed any deliberate or intentional grounds in allowing the encroachments to occur.
2. Any architectural alterations or design changes to the garage to conform with the minimum setbacks would create undue and excessive hardships for the applicant when other more reasonable options are available.

Mr. Donald C. McIntosh
Page 3
July 30, 1998

Based on the above cited considerations, there are no reasonable solutions available without excessive demands being placed on the owners when a more reasonable alternative is available by the granting of this variance application.

INTENT AND PURPOSE

The intent and purpose of requiring buildings setbacks within a subdivision is to assure that adequate air and light circulation is available between structures and property lines. The garage encroaches 1 foot 5-3/8 inches into the required 20 feet front yard. This encroachment into the front yard will not diminish the ability for adequate light and air to circulate and will still provide adequate open space. Therefore, while the Zoning Code requires a minimum 20 feet front yard, in this particular case, the encroachment will not visually or physically impact or be adverse to any adjacent properties or development with the granting of this variance. The rest of the existing garage complies with the minimum yard requirements of the Zoning Code.

Based on the foregoing findings, this variance request would be consistent with the general purpose of the zoning district and the intents and purposes of the Zoning Code, Subdivision Code and the County General Plan. Furthermore, this variance will not be materially detrimental to the public's welfare and will not cause substantial adverse impact to the area's character and to adjoining properties.

This variance request is approved, subject to the following conditions:

1. The owner, assigns or successors shall be responsible for complying with all stated conditions of approval.
2. The approval of this variance shall be included in the conveyance document for the subject property and a copy of the recorded conveyance document shall be submitted to the Planning Department within a year from the effective date of approval of this variance.
3. If applicable, approval from the Board of Appeals for all Building Code Violations will be obtained.
4. All other applicable State and County rules and regulations shall be complied with.

Should any of the foregoing conditions not be complied with, the Planning Director may proceed to declare this Variance Permit null and void.

Mr. Donald C. McIntosh
