Kailua-Kona, HI 96740

Dear Mr. Harding:

Special Management Area Use Permit Application
TMK: 7-6-22:49 and 84

The Planning Commission at its duly held public hearing on April 11, 1990, voted to approve your application, Special Management Area Use Permit No. 295, to allow the development of a 15-lot residential subdivision and related improvements along the makai side of Kuakini Highway and at the south end of Kupuna Street within the Komohana Kai Subdivision, Holualoa, North Kona, Hawaii.

Approval of this request is based on the following:

The purpose of Chapter 205-A, Hawaii Revised Statutes (HRS), and Rule No. 9, Special Management Area (SMA) Rules and Regulations of the County of Hawaii, is to preserve, protect, and, where possible, to restore the natural resources of the coastal zone areas. Therefore, special controls on development within the area along the shoreline are necessary to avoid permanent loss of valuable resources and the foreclosure of management options.

One of the criteria for approving a development within the SMA is that it is consistent with the General Plan and zoning designation. The proposed development conforms to the General Plan Land Use Pattern Allocation Guide (LUPAG) Map and zoning designation which designate the area as Medium Density Urban and Single Family Residential-15,000 square foot (RS-15). A General Plan Course of Action for the North Kona District is to "Encourage the development of appropriately located and serviced

Page 2

privately-held and State-owned lands for houselots." The proposed development will expand on what is an established single family residential community. All public utilities and services are available to the project site. Therefore, the proposed development would be consistent with the intent and purpose of the Zoning Code and the General Plan.

Another criteria in reviewing an SMA Use Permit application is that, "The development will not have any significant adverse environmental or ecological effect, except as such adverse effect is minimized to the extent practicable and clearly outweighed by public health, safety, or compelling public interest. Such adverse effect shall include, but not be limited to, the potential cumulative impact of individual developments, each one of which taken in itself might not have a substantial adverse effect and elimination of planning options." The proposed development is not anticipated to have any substantial adverse environmental or ecological effects. The properties, which are located within an area that has been extensively developed, is not known to contain any unique ecological systems nor provide habitats for any endangered plant or animal species. No adverse impacts on air and water quality are expected to be generated by the proposed development. Air emissions generated during the construction phase can be mitigated by existing regulations. Any potential runoff or discharge as a result of the project can be handled by on-site improvements as may be required by the Department of Public Works. Negative impacts resulting from soil erosion and runoff during site preparation and construction phases are unlikely due to the very thin soil cover and the pahoehoe bedrock. However, should erosion and runoff occur, they can be adequately mitigated through compliance with existing regulations.

The proposed subdivision is not anticipated to have any significant adverse impacts on coastal ecosystems or public access along the shoreline due to the project's considerable distance from the coastal waters. Drainage improvements as may be required by the Department of Public Works will effectively inhibit erosion, water runoff, and potential pollutants from entering into coastal areas.

An archaeological field survey was conducted on the project site and a determination was made that the few features that were located were not significant. Thus, no further

Page 3

archaeological work is recommended. However, this approval recommendation is conditioned upon notification of the Planning Department and appropriate action should any unidentified sites or remains be found before or during construction activities.

There are no major identified scenic resources and viewplanes from or around the subject properties. However, the proposed development should not greatly impact any possible scenic vistas from Kuakini Highway since the County Zoning Code limits the development to a maximum height of 35 feet.

Based on the above, it is determined that the proposed development will not have substantial adverse impacts on the surrounding area, nor will its approval be contrary to the objectives and policies of Chapter 205A, HRS, relating to Coastal Zone Management and Rule No. 9 of the Planning Commission relating to Special Management Area.

Approval of this request is subject to the following conditions:

1. The applicant, its successors, or assigns shall be responsible for complying with all stated conditions of approval.
2. The required water commitment payment shall be submitted to the Department of Water Supply in accordance with its "Water Commitment Guidelines Policy" within 90 days from the date of approval of the permit.
3. Final subdivision approval of the subject properties shall be secured within one year from the date of tentative subdivision approval.
4. Curbs, gutters and sidewalks shall be provided within the subdivision meeting with the approval of the Department of Public Works.
5. Should any unidentified sites or remains such as artifacts, shell, bone, or charcoal deposits, human burials, rock or coral alignments, pavings, or walks be encountered, work in the immediate area shall cease and the Planning Department shall be immediately notified. Subsequent work shall proceed upon an archaeological clearance from the Planning Department when it finds that sufficient mitigative measures have been taken.

6. Access to the subject properties shall meet with the approval of the Department of Public Works.
7. Comply with all other applicable laws, rules, regulations, and requirements, including those of the Departments of Public Works and Health.
8. An annual progress report shall be submitted to the Planning Director prior to the anniversary date of the approval of the permit. The report shall include, but not be limited to, the status of the development and to what extent the conditions of approval are being complied with. This condition shall remain in effect until all of the conditions of approval have been complied with and the Planning Director acknowledges that further reports are not required.
9. An extension of time for the performance of conditions within the permit may be granted by the Planning Director upon the following circumstances: a) the non-performance is the result of conditions that could not have been foreseen or are beyond the control of the applicant, successors, or assigns and that are not the result of their fault or negligence; b) granting of the time extension would not be contrary to the General Plan or Zoning Code; c) granting of the time extension would not be contrary to the original reasons for the granting of the permit; and d) the time extension granted shall be for a period not to exceed the period originally granted for performance (i.e., a condition to be performed within one year may be extended for up to one additional year). Further, should any of the conditions not be met or substantially complied with in a timely fashion, the Director shall initiate procedures to revoke the permit.

This approval does not, however, sanction the specific plans submitted with the application as they may be subject to change given specific code and regulatory requirements of the affected agencies.

Mr. Charles E. Harding
