

- PermitLog
  - o Yr2007docs
    - SmaAppAssmnt
      - The shoreline pedestrian access easement as a condition to the final subdivision approval is considered “development”.
      - Based off of.....
        - o PermitLog -> Yr2011docs -> timeExt
          - The related subdivision number is SUB 06-000311
          - There is NO RECORD of sub 06-000311 in the filing cabinet or on ArcReader.
  - o A lateral public access easement was agreed upon in the conditions, which seems to be trail # 300 on shoreline public access in ArcReader.
    - However, if you look at the subdivision map (Alika), it is showing a mauka / makai trail.
  - o No public access plan or anything stating “a public access plan was submitted” was found in TMK folder 8-8-2:14,17, 22.
  - o PermitLog -> Yr2011docs -> timeExt
    - A public access shoreline easement time extension request was submitted in 2011.
    - No letter granting the approval of this time extension exist in folder.
    - It seems as if the subdivision is responsible to create the public access plan but there is no record of subdivision (06-000311)
