MEMORANDUM

TO: Donna Fay Kiyosaki, Chief Engineer

FROM:  Virginia Goldstein, Planning Director

SUBJECT: Grubbing Permit ✓
John Clark/John Swift
Opihihale, S. Kona, HI
TMK: 8-7-13

We have reviewed the subject grubbing permit and plans in regards to Special Management Area (SMA), Historical Sites, Conservation District and other special requirements. We note that the grubbing activity involves an old government right-of-way and that the applicants are working with the Land Management Division-DLNR, regarding the subject improvements. We have no objections to the issuance of this permit provided that proper governmental approvals are granted and appropriate assurances is made that the grubbing activity will be confined only to the existing right-of-way.

Should you have any further questions, please feel free to contact Masa Onuma of this office.
